[LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [GeeksforGeeks](#) | [Portfolio](#)

Summary

Software Engineer with strong expertise in **backend engineering**, **data structures & algorithms**, and **scalable system development**. Solved **300+ DSA problems** and ranked in the **Top 5%** of batch. Experienced in designing **RESTful APIs**, optimizing performance, and building secure applications using modern technologies, with a focus on **scalability**, **clean architecture**, and **system reliability**.

Education

Guru Gobind Singh Indraprastha University (GGSIPU), India

Bachelor of Technology (B.Tech) in Computer Science & Engineering

(Nov 2022 – Jun 2026)

- **CGPA:** 8.86 (up to 7th semester)

Experience

Backend Development Intern – Podesk IT

(Jun 2025 – Jul 2025)

- Developed **scalable RESTful APIs** using **Node.js** and **Express.js**, handling authentication, data processing, and secure communication, reducing **response time by 20%**.
- Designed **optimized MongoDB and SQL schemas**, improving query efficiency and **reducing load by 30%**.
- Tested and debugged backend modules, enhancing **system stability** and ensuring reliable **API performance**.

Achievements & Activities

- Solved **300+ DSA problems** across **LeetCode** and **GeeksforGeeks** — consistent problem-solving practice.
- Ranked in the **Top 5% of batch**, achieving highest CGPA in the college up to 7th semester.
- **Google Student Ambassador:** Led **AI-focused workshops** introducing Google Gemini and emerging technologies, mentoring **100+ students**.
- **IBM SkillsBuild: Web Development Fundamentals (MERN Stack).** | [Certification](#)
- **Cisco Networking Academy:** Completed **Introduction to Cybersecurity**, covering **network security**, threat mitigation, and online safety. | [Certification](#)
- **Oracle:** Cloud Infrastructure 2025 **AI Foundations Associate** certification. | [Certification](#)
- **Cognizant:** Agile Methodology Job Simulation — practiced sprint planning, retrospectives, and team workflows. | [Certification](#)

Projects

TickIT: Ticket Booking Platform [GitHub](#) | App Deployed ([Link](#))

React.js, Node.js, Express.js, MongoDB, JWT, Bcrypt, Redis

- Designed and developed a **scalable ticket booking system** using MERN stack with modular **REST API architecture** and efficient request handling.
- Implemented **JWT-based authentication** and secure password hashing using **Bcrypt**, ensuring robust **API security**.
- Integrated **Redis-based rate limiting** to control API traffic and prevent abuse, improving system **reliability and stability**.
- Optimized **MongoDB schema and queries** to reduce response latency and enhance backend performance.

QuickThumbnail: AI Thumbnail Generator [GitHub](#) | App Deployed ([Link](#))

MERN Stack, External AI API, JWT Auth, MongoDB

- Built a **MERN-based AI application** integrating external APIs for **automated thumbnail generation** with real-time processing.
- Developed **secure backend services** using **JWT authentication** and role-based access control for protected routes.
- Handled **asynchronous API communication** and optimized response flow for improved performance and user experience.
- Designed a **scalable backend structure** supporting efficient data handling and future feature expansion.

MyMovies: Movie Recommendation App [GitHub](#) | App Deployed ([Link](#))

React.js, TMDB API, Firebase, REST APIs

- Built a movie recommendation web app using **TMDB APIs** serving real-time movie data for 1000+ requests.
- Enabled **genre-based filtering**, search functionality, and **trailer playback** improving user engagement.
- Developed responsive UI using React.js and integrated **Firebase** for backend services such as data handling and hosting.
- Implemented **API integration** using **asynchronous data fetching** and robust **error handling** to ensure smooth performance.

Skills & Tech Stack

Programming: Java, C++, JavaScript (ES6+), SQL

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, Redis, Firebase, Vercel, Render
