SUMMARY

Computer Science undergraduate skilled in building scalable **REST APIs**, secure **authentication systems**, and **AI-integrated full-stack applications** using **Node.js**, **Express.js**, **MongoDB**, and **React.js**. Strong understanding of **Data Structures & Algorithms**, **database design**, **API architecture**, and modern **software engineering practices**. Certified by **AWS**, **Cisco**, **Deloitte**, and **IBM SkillsBuild**.

EXPERIENCE

Podesk IT

Jun 2025 – Jul 2025

Backend Development Intern

Noida

- Built scalable **REST APIs** using **Node.js** and **Express.js** with optimized backend query handling.
- Designed indexed **MongoDB schemas** for authentication and user management systems.
- Implemented secure **JWT authentication** with protected routes and token validation.
- Improved backend reliability through centralized error handling and API validation using **Postman**.
- Collaborated in **Agile development** cycles with Git-based deployments and pull request reviews.

SKILLS

Languages: JavaScript, Java, Python, SQL

Frontend: React.js, Tailwind CSS, Context API

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Middleware Architecture

Databases: MongoDB, MySQL, Firebase

Cloud & Deployment: Vercel, Render, Railway

Tools: Git, GitHub, Postman, Redis

APIs & AI Integration: Google Gemini API, Hugging Face API, TMDB API

Core Computer Science: Data Structures & Algorithms, Database Management Systems, Operating Systems, OOPs

PROJECTS

Quick Thumbnails | *React.js, Node.js, Express.js, MongoDB, JWT, Hugging Face API*

[GitHub](#) | [Live Demo](#)

- Engineered a full-stack AI image generation platform with secure **JWT authentication** and protected backend APIs.
- Integrated **Hugging Face APIs** for real-time AI thumbnail generation with asynchronous request handling.
- Optimized backend workflows and **MongoDB queries** to improve image generation response efficiency.
- Designed scalable **REST APIs** with modular routing, middleware validation, and centralized error handling.
- Deployed production-ready frontend and backend services using **Vercel** and **Render**.

AI Code Reviewer Platform | *React.js, Node.js, Express.js, Google Gemini API, PrismJS*

[GitHub](#) | [Live Demo](#)

- Developed an AI-powered code analysis platform using **Google Gemini API** for automated review suggestions.
- Built an interactive code editor with syntax highlighting, markdown rendering, and structured response visualization.
- Implemented backend request validation, API rate handling, and optimized response processing for stability.
- Improved frontend rendering and asynchronous API communication to reduce latency during code submissions.
- Structured modular backend architecture for scalable API integration and maintainable feature expansion.

MyMovies - Movie Recommendation App | *React.js, Firebase, TMDB API*

[GitHub](#) | [Live Demo](#)

- Built a responsive movie discovery platform integrating **TMDB APIs** for real-time search and recommendations.
- Implemented optimized frontend state management and asynchronous API handling for improved rendering performance.
- Developed genre-based filtering, dynamic search functionality, and personalized recommendation workflows.
- Integrated **Firebase authentication** and cloud-based user state management for personalized experiences.
- Improved mobile responsiveness and rendering consistency across multiple screen sizes and devices.

ACHIEVEMENTS & CERTIFICATIONS

- Solved **250+ DSA problems** across **LeetCode** and **GeeksforGeeks** platforms.
- Maintained a strong academic record with an overall **8.68/10 CGPA**.
- Mentored **100+ students** in **AI** and **web development** as a Google Student Ambassador.
- Participated in multiple **hackathons**, coding contests, and collaborative programming events.
- Earned **IBM SkillsBuild MERN Stack Certification** and **Oracle OCI AI Foundations Associate** certification.
